

Turnkey Packages

TeamTracer Prox Card

Top of the line system for rapid personnel deployment. Offering the most secure and versatile ID and personnel tracking solution, a TeamTracer® system incorporating proximity technology cards is the cost-effective application for any-sized emergency response team. A typical package includes:

- TeamTracer® personnel tracking software
- Magicard Pronto color card printer and ribbon
- Image capture system
- Portable USB proximity card reader
- Customizable HID proximity cards
- Badge clips, slot punch

TeamTracer Prox Tag

Using the identical rapid deployment technology as TeamTracer® Prox Card, Prox Tags offer the benefit of ultra-portable personnel identification and verification tags with lasting durability. A typical package includes:

- TeamTracer® personnel tracking software
- Portable USB prox card reader
- HID proximity key tags

TeamTracer Mag Stripe

TeamTracer® can incorporate existing identification devices such as state-issued drivers licenses with a magnetic stripe, or create customized ID cards and encode the magnetic stripe for quick on-scene verification. A typical package includes:

- TeamTracer® personnel tracking software
- Magicard Pronto color card printer and ribbon
- Image capture system
- Magnetic stripe reader and cards
- Badge clips and slot punch

TeamTracer Bar Code

Barcodes are the most universal identification tool in existence today - why not use this simple instrument to your advantage. Inexpensive and reliable, teams can also use TeamTracer® and bar code technology to track and manage equipment. A typical package includes:

- TeamTracer® personnel tracking software
- Magicard Pronto color card printer and ribbon
- Image capture system
- Barcode reader
- PVC cards, clips and slot punch

TeamTracer Package Options

NESC has remained on the forefront of identification and accountability since 1994, and offers a complete line of photo ID software, hardware and peripheral products. As such, we are able to provide customized TeamTracer® packages to meet the needs of any-sized emergency response team or specific personnel tracking requirements. Contact NESC for more information.
